ELECTRICIANS JOIN STRIKERS

Decline to Work With the Non-union Laborers.

RAILWAY SHOPS IN DARKNESS

Employees in the Light Plant of the Canadian Pacific Quit Work—Reported That the Trainmen Also Will Go Out and That the Entire System Will Be Tied Up.

CARDINAL GIBBONS BETTER

American Prelate's Illness May Soon Be Overcome.

Rome, Aug. 7.—The condition of Cardinal Gibbons, who was taken ill Wednesday at Castle Gandolfo and was brought to Rome in order that he might be treated, is better. The internal symptoms have moderated somewhat, his headache is less violent and his temperature has fallen to 100 degrees.

The attending physician has ordered the American prelate to take a complete rest and has put him on a liquid diet. He considers the attack due to fruit eaten by the cardinal and expects that the illness soon will be overcome. He says that Cardinal

CARDINAL GIBBONS.

Sixty union pickets have been placed on duty at the local shops, the company not being adverse to passive picketing, which is not illegal. At some shops in Far Western cities armed police are on guard, but this is not considered necessary here. All day at the shops everything was as quiet as could be. Outside of maintenance of way and stores employees, the only two departments not on strike, hardly a soul went in and there was no one around the small door of admission, which has been made in the wall close to the big gates, which are now strongly barred and only opened for entrance or exit of vehicles.

Pickets at Railway Terminals.

The most striking feature of the situation was the placing of between fifty and sixty pickets at the various railroad terminals and in the vicinity of the shops to meet all mechanics coming into the city and dissuade them from going to work for the company, if they had any such intention. J. H. McVey, local chairman of the strikers, authorized the statement that he had information from what he regarded as a thoroughly reliable source that a carload of strike-breakers is on the way here from Chicago. He was unable to state the number of men coming nor could he say exactly the hour of their arrival, although a strict lookout will be kept for them by pickets guarding the Soo Line and Great Northern terminals. Mr. McVey has been assured of the support of the Federation of Labor and already strike allowance has been made by the head office of the moulder. Single men will receive \$5 per week and married men \$7 during the life of the strike. Other branches are rapidly falling into line and ere long every striker will be provided for.

There is a report that the trainmen will come out on Saturday. This is denied by McVey, but is affirmed by all strikers who will talk, and who assert that the whole system will be tied up by Sunday. Trainmen do not consist of engineers, firemen and conductors, but of switchmen, brakemen, baggagemen and some of the conductors.

Word has reached here that the Canadian Pacific railroad coal storehouse was burned at North Bay, Ont. At Kenora, Ont., divisional point east of here, a locomotive was run into a turntable pit and it is claimed that the act was done by one of the striking shopmen.

PLUNGED INTO DARKNESS.

Brief Strike of Electricians Cuts Off Lights in Paris.

Paris, Aug. 7.—Paris was plunged into darkness for two hours because of an attempt of electricians to carry out a general strike similar to that of March, 1907. The maneuver, which fortunately proved abortive, is attributed to a desire of the revolutionary laborites for revenge for an order issued Thursday afternoon by the prefect of the Seine closing the labor exchange to the federated unions of the department of the Seine because of the part the labor exchange played in the recent disturbances.

Shortly before 9 o'clock at night the current was abruptly cut off. Consternation reigned in the newspaper offices, which were threatened with the deprivation of both light and power with which to run their presses. Urgent messages were dispatched to various parts of the city for engines

and automobiles with which it was intended to generate power. To the great relief of all persons concerned, however, the supply of electricity was resumed shortly after 10 o'clock as abruptly as it had ceased.

It appears that when they came on duty the night shift without the slightest warning, announced their intention to cease work and cut off the power. The director of the plant refused to be intimidated and threatened instant dismissal to all the electricians who persisted in the attitude they had taken. After deliberating for some time the workmen resumed work.

CARDINAL GIBBONS BETTER

American Prelate's Illness May Soon Be Overcome.

Rome, Aug. 7.—The condition of Cardinal Gibbons, who was taken ill Wednesday at Castle Gandolfo and was brought to Rome in order that he might be treated, is better. The internal symptoms have moderated somewhat, his headache is less violent and his temperature has fallen to 100 degrees.

The attending physician has ordered the American prelate to take a complete rest and has put him on a liquid diet. He considers the attack due to fruit eaten by the cardinal and expects that the illness soon will be overcome. He says that Cardinal

TWO SUSPECTS UNDER ARREST

Supposed to Have Murdered a Youth in Chicago.

COMMITTED BY A DEGENERATE

Police Do Not Believe That Crime Resulted From Attempt to Wipe Out the "Greek Slave" Traffic in the Windy City—One of the Suspects Caught in Wisconsin.

Chicago, Aug. 7.—Following the identification of the mutilated boy's body found in Mud lake and adjacent ponds and waterways as that of Tuffa Shishine, a Syrian, the police arrested Joseph Hasson on suspicion of being the murderer of the boy. In Hasson's room the police found a blood-stained garment, several blood-stained saws and an axe. The body gave every indication of having been dismembered with such instruments.

Developments have come rapidly in this case. On Tuesday the detectives were called to Mud lake, a pond which formed in the old bed of a branch of the Chicago river when the waters of the river were diverted to the drainage canal. Here boys had discovered the lower limbs of a human being, severed at the hips and at the knees and with one of the feet missing. The gory remains when found were wrapped in an old shirt and a news paper of July 29. The victim was then supposed to have been a woman, but the discovery of the torso the following day in the drainage canal a mile distant upset this supposition. Every Greek detective in the city was put to work on the case in the belief that a Greek lad, a victim of the parricide system, had been summarily dealt with by some countryman against whom the boy had testified in the recent cases brought by the government to wipe out the "Greek slave" traffic.

Boys Discovered the Head.

Thursday boys swimming in Pellett's pond half a mile from the canal and having no connection with it, discovered the head, which was removed to the morgue and placed with other portions of the body. With the body thus restored it was possible to formulate a close description of the boy.

At the Lawndale station it was found the description tallied somewhat with that of Tuffa Shishine, whose disappearance from his home at 7 Johnson street last Sunday night had been reported by the lad's father, Samuel Shishine. First the shirt which the boy had worn, and the corpse were identified by members of the Shishine family, the mother fainting when she gazed for the first time on the body.

Inspector Dorman held a long interview with Samuel Shishine and at its conclusion the inspector declared that the boy had been the victim of a degenerate.

Taffa was fifteen years of age, attended school and sometimes sold newspapers. That he was entangled in any crime or conspiracy which might have led to his murder is not entertained by the police.

A second arrest in the case took place at Racine, Wis., according to a message received from that city by Assistant Chief of Police Schuetter. The prisoner is Steve Cantricote, who roomed at the Shishine home until Saturday, when he left for Racine.

AGED RECLUSE SLAIN.

Robbery the Motive of Murder Committed in a Box Car.

Jerseyville, Ill., Aug. 7.—Peter Meyer, seventy-five years old, a recluse, was found dead on the floor of a box car in which he lived on the outskirts of this place, and \$10,000 he is known to have had with him is missing. The body was several feet from his bed, surrounded by overturned chairs and torn clothing. Meyer's mouth was clotted with blood and there were many indications that his death was not a natural one.

Meyer, who had lived here for twenty-five years, is supposed to have been worth \$25,000. Two weeks ago he sold a 100-acre farm and it was generally believed that he had placed the proceeds with other money which he had hidden in his crude home.

Conditions Are Improving.

Vancouver, B. C., Aug. 7.—There are no new developments in the fire situation in Elk River valley. Conditions are gradually improving and people are returning to the scene of their former homes. Permits are granted at Fernie to erect temporary wooden buildings to be replaced with brick in ten months. People are being supplied with all necessities. The forest fire is diminishing in intensity and is now not near any settlement.

You should know if you don't

Talk No. 6

"MICHAEL'S"

"MICHAEL'S"

ANNOUNCED BY MACK.

Appointment of Two New Democratic Committees.

Buffalo, N. Y., Aug. 7.—Chairman Norman E. Mack of the Democratic national committee announced before his departure for Chicago the appointment of a finance committee for the Democratic campaign with Moses C. Wetmore of St. Louis as chairman and John E. Osborne of Wyoming as vice chairman, and a speakers' committee, with John H. Atwood of Kansas as chairman, and Champ Clark of Missouri as vice chairman. The finance committee is made up of twenty-nine members and the speakers' committee is composed of twenty-seven members.

Announcement also was made by Chairman Mack that Senator Charles A. Culberson of Texas had been appointed to succeed David R. Francis of Missouri as chairman of the advisory committee. In making known the change, Mr. Mack said:

"Former Governor Francis' acceptance of a place on the committee was assured. I did not anticipate that he contemplated a stay of any length abroad, but wired him. He answered that he would be absent during so much of the campaign that he ought not to be chairman, but would be pleased to be a member of the committee. Senator Culberson was asked to accept the chairmanship and has accepted."

CORDIAL GREETING EXTENDED TO TAFT

Republican Candidate Talks to Lawyers of Virginia.

Hot Springs, Va., Aug. 7.—There was no reservation in the Southern hospitality accorded to William H. Taft by the Virginia State Bar association here on the occasion of the address of the Republican candidate on the law's delay. His presence and introductory pleasantries were applauded by an audience representative of the social life of the Old Dominion, and the burden of his speech met the expressed approval of the lawyers present. At his conclusion, Mr. Taft was surrounded by members of the audience. A group photograph was taken under the trees, with Mr. Taft in the center.

At the banquet, which brought to a close the twentieth annual session of the association, Mr. Taft responded to the toast, "The President."

Mr. Taft prefaced his forty-minute speech on the law's delay by expressing two embarrassments he felt in appearing before a Virginia audience. The first he made clear by this anecdote:

"As I was entering the hall here I was introduced to a very charming daughter of Virginia, a married lady, of whom I inquired on hearing her name, which was Virginia name, whether she was a relative of a friend of my own from Virginia who bore the same name."

"Oh, no," she replied, "my poor husband is a Yankee."

The story seemed to remove the first embarrassment. The other was Mr. Taft's difficulty in discussing before the bar of Virginia a technical question, "because you know," he said, "eight years ago I ceased to be a judge and became a mere politician."

TRIUMPH FOR YOUNG TURKS

New Cabinet Is Composed of Their Nominees.

GRAND VIZIER FOR THIRD TIME

Kamil Pasha, Who Throughout His Career Has Struggled for a Constitutional Regime, Again Returned to Power—Committee Publishes a Remarkable Document.

Constantinople, Aug. 7.—The Young Turks have now completely triumphed. A new cabinet practically composed of their nominees and commanding public confidence is established on a constitutional basis, the sultan having given up his claim to the right to appoint the ministers of war and marine. Kamil Pasha, who for the third time has become grand vizier throughout his career has struggled for a constitutional regime and third has suffered exile for his opinions.

His ministry, with two exceptions is composed of new men of liberal views. Two of them are Christians Gabriel Effendi, the minister of works is an Armenian, and Prince Mavromatis, the minister of agriculture, is a Greek.

The new ministry will publish its programme almost immediately and prepare for the elections.

Within the space of a fortnight since the proclamation of the constitution a regime to be firmly established and the court camarilla completely dispersed, without any disturbance. The Young Turks' committee publishes a remarkable document calling on the people not to attempt to satisfy personal vengeance on the ground that the indulgence in personalities is opposed to its sublime ideal. It calls upon all the government officials to do their duty and to report to the committee any difficulties which they may encounter in so doing. The document prohibits all private communications with the palace and urges the people to trust the committee and obey it implicitly.

MINNESOTA REPUBLICANS.

Open the State Campaign at a Meeting in Duluth.

Duluth, Aug. 7.—The Republican campaign in Minnesota was opened when several speakers of state and national prominence addressed the members of the West Duluth Republican club.

J. F. Jacobson, candidate for governor, spoke on divided responsibility, sounded the keynote of harmony and pleaded for a state government in the hands of a single party.

National Committeeman Frank B. Kellogg of St. Paul assailed the national Democratic platform. His speech related mainly to national issues. Congressman J. Adam Bede, Senator Moses E. Clapp and Clarence B. Miller of Duluth also delivered addresses.

Sunday is that day in the week when a man finds out in what spot his wife intends to sweep next and sits there.—*Atchison Globe*.

PYTHIANS ELECT OFFICERS

Henry P. Brown of Texas Is Chosen Supreme Chancellor.

Boston, Aug. 7.—With the election of their officers the supreme lodge of the Knights Pythias closed the most important business session of their twenty-fifth convention, which opened in this city Monday. The Pythian Sisters also elected officers and exemplified the secret work of the order. The uniform rank devoted such of the day as was free from rain to competitive drills on Franklin field for the \$10,000 cash prizes offered. Announcement of the awards will be made Saturday.

Henry P. Brown of Cleburn, Tex., was elected supreme chancellor without contest, he having served as vice chancellor the past year. There was a spirited contest for vice chancellor. George W. Hanson of Calais, Me., finally was chosen. Other officers elected are:

Supreme prelate, Rev. Dewitt C. Cobb, Salem, N. J.; supreme keeper of records and seal, R. L. C. White, Nashville, Tenn. (re-elected); supreme master of exchequer, Thomas D. Meares, Wilmington, N. C. (re-elected); supreme master at arms, Samuel P. Davis, Davis, Okla.; supreme inner guard, E. Allison Powers, Quebec, Can.; supreme outer guard, William D. Cameron, Meridian, Miss.; board of insurance control, for six years, U. S. G. Cherry, Sioux Falls, S. D., and C. S. Davis, Denver.

The uniform rank assembly, consisting of twenty-six brigadier generals, formally appointed Major General Arthur J. Stobart of St. Paul, Minn., to succeed himself in command of the uniform rank. The appointment will come up before the supreme lodge for ratification.

FIFTEEN PEOPLE HURT.

Attempt Made to Dynamite a Viaduct in Cincinnati.

Cincinnati, Aug. 7.—Fifteen people were slightly injured and windows in all houses and factories within the immediate neighborhood were destroyed and the Harrison avenue viaduct suffered a \$10,000 damage as a result of an attempt to destroy the viaduct.

The viaduct is in course of construction and has been a matter of much contention during the last two city administrations.

At one time nonunion labor was employed, which caused a furor in local union labor circles and it is claimed by some that a union labor fanatic is the author of the explosion. The viaduct was to have been turned over to the city within a short time. The damage is thought to be confined to one pier. Several arrests have been made.

CARRIED A FORTUNE.

Man With Mind Unbalanced by Heat Arrested in Milwaukee.

Milwaukee, Aug. 7.—His mind unbalanced by heat and heat, Norman C. Bassett, aged fifty, manager of a department in the Allis-Chalmers plant, wandered for several hours about town until a patrolman took him to the police station.

He carried a satchel which was found to contain \$50,000 in money, bonds and other negotiable paper when opened at Emergency hospital.

When taken into custody Bassett talked incoherently, was unable to tell the officers anything about himself, even his name, and imagined he was in a strange foreign city pursued by thieves. He is being kept at Emergency hospital until trial in the New England state of which he heard from.

PATCH is always glad to get any fresh
news items. The newer they are the
glad we are to get them.

G. N. Davis, special apprentice of
the Northern Pacific is back from Chi-
cago and St. Louis, where he has been
inspecting iron and steel work on re-
frigerator cars being built for the rail-
road company.

Mr. and Mrs. W. K. Porter and
daughter, of LeRoy, came down from
Walker today, and remained in the city
to visit Mr. and Mrs. M. T. Dunn.

They expect to go to the twin cities
tomorrow morning.

The small frame building on South-
west corner of Quince and south Fifth
streets was destroyed by fire Wednes-
day evening. There was a large crowd
in attendance for many supposed the
brewery was in danger.

A \$1.00 straw hat for 50c is a good
investment, if you can't wear it out
this season you can next—all our straw
hats on the same basis—Linnemann's.

* Rev. Mr. Abramson leaves tomorrow
for International Falls where he will
spend a month, exchanging pulpits
with Rev. H. E. Fuller, of that city,
who will occupy the pulpit in the First

Baptist church here for the next month.

Richard Sinclair, the two and one-
half year old child of Mr. and Mrs.

Robt. Sinclair, 1207 Norwood street
died Wednesday evening of cholera infantum,
and the father took the remains to Owatonna yesterday for interment.

H. W. Topping, of the firm of Parker
& Topping, and Wm. Moir, supt. me-
chanical power on the Northern Pacific,
arrived in the city this afternoon. General
Manager Slade is expected to arrive
tomorrow. It is said that needed
improvements in the foundry are the
matters under consideration.

We expect our Saturday trade to
equal last Saturday, our opening day.
So many new bargains have been
added—Linnemann's. It

Roy Edmund Anderson, the oldest
child of Mr. and Mrs. Ed. Anderson,
313 North Third street, died last night
from appendicitis. He had only been
sick a few days and failed to rally
from an operation. The little fellow
was six years of age and a bright child.
The remains will be taken to Braham,
Minn., tomorrow and the funeral held
at that place Sunday.

Foley's Kidney Remedy will cure any
case of kidney or bladder trouble that
is not beyond the reach of medicine.
No medicine can do more. H. P. Dunn.

Head Council A. R. Talbot, of the
Modern Woodman of America, who is
spending a vacation with the Nebraska
colony at Pelican lake, has been induced
to speak at a large Woodmen meeting
at Pequot on Saturday evening. Woodmen
from neighboring towns will be present.
An invitation has been extended to Brainerd Camp to attend and it
is expected a big delegation from Brainerd will go up Saturday evening.

How's This?

directly up to the blood and mucous surfaces of
the system. Testimonials sent free. Price 75c
per bottle. Sold by all druggists.

Take Hall's Family Pills for constipation.

CHANGES IN GRAIN RATES

FILING FEE TO BE ONLY TEN DOLLARS

County Attorney Warner Received
Ruling from Attorney General
of State

SETTLES QUESTION OF FEES

Law Apparently Compelled Payment of \$20 But Attorney Does Not So Rule

County Attorney Warner has received a communication from the attorney general of the state of Minnesota giving his interpretation of the amendment to the law governing the filing fee for county offices. According to the attorney general the apparent meaning of the amendment, that candidates should pay \$20 for filing, was the result of an error in the punctuation of the printed copies. His decision is that the candidates should pay \$10 each before filing for the primary, and nothing for the general election. The county auditor will therefore refund \$10 of the amount paid by Messrs. Bane and Albertson.

County Superintendent Wilson filed for renomination today.

Kyle-McFadden

Claude C. Kyle and Mrs. Julia K. McFadden were united in matrimony at St. Paul Wednesday evening, Aug. 5th, by Rev. John Wright, of St. Paul's Episcopal church of that city. Mr. and Mrs. Kyle left St. Paul Thursday evening for Yellowstone park and Western Canada on a two weeks wedding trip. Mr. and Mrs. Kyle have a host of friends in Brainerd who wish them much joy and prosperity. Their future home will be at 1724 Marshall Ave., Merriam Park.

No one is immune from kidney trouble, so just remember that Foley's Kidney Remedy will stop the irregularities and cure any case of kidney or bladder trouble that is not beyond the reach of medicine. H. P. Dunn. mwf

Important Change of Time

Commencing Sunday, August 9, Northern Pacific train No. 11 for Staples, Minnesota, Dakota, and Pacific Coast points will leave Brainerd at 12:20 p.m. instead of 11:10 a.m. This change puts this train back to the old schedule in effect prior to May 31. 554

Horan—Is O'Brien a good bluffer? Doran—No; whenever he gets a shpade he spits on his hands.—London Illustrated Bits.

Attention, Asthma Sufferers!

Foley's Honey and Tar will give immediate relief to asthma sufferers and has cured many cases that has refused to yield to other treatment. Foley's Honey and Tar is the best remedy for coughs, colds and all throat and lung trouble. Contains no harmless drugs. H. P. Dunn. mwf

Norris and Rowe Circus

With the Greater Norris and Rowe Circus, museum, menagerie, hippodrome and congress of nations which will exhibit in this city Wednesday, August 12, are a number of performers of international reputation. Performers have appeared at all the principal circuses and hippodromes of the world prominent among them being the Peerless Potters, a troupe of aerialists whose flights through space quicken the pulse and "make the hair stand on end like the quills upon the fretful porcupine." This family of aerialists are acknowledged to be the greatest performers in their line in the world. Another family of wide reputation is the Astral St. Leons, scions of the famous family of that name, whose achievements in the sawdust arena have been seen throughout the world. The Honey-Mora troupe of aerialists were brought to this country from Europe direct by Norris and Rowe.

A Boon to Elderly People

Most elderly people have some kidney or bladder disorder that is both painful and dangerous. Foley's Kidney Remedy has proven a boon to many elderly people as it stimulates the urinary organs, corrects irregularities and tones up the whole system. Commerce taking Foley's Kidney Remedy at once and be vigorous. H. P. Dunn. mwf

CHANGE OF NAME

H. R. Hitch Company Succeeded by The Northwestern Fuel Company in Wood and Coal Business

The wood, coal and cement business heretofore conducted under the name of the H. H. Hitch Co. will hereafter be done under the name of the Northwestern Fuel Co. It will be conducted by Mr. Hitch and the same parties heretofore interested with him.

Cured Hay Fever and Summer Cold
A. S. Nusbaum, Batesville, Indiana, writes: "Last year I suffered for three months with summer cold so distressing that it interfered with my business. I had many of the symptoms of hay fever, and a doctor's prescription did not reach my case, and I took several medicines which seemed only to aggravate it. Fortunately I insisted upon having Foley's Honey and Tar. It quickly cured me. My wife has since used Foley's Honey and Tar with the same success." H. P. Dunn. mwf

FOOT BALL MEETING

Well Attended Meeting of Foot Ball Players in Roller Rink Thursday Evening

There was a well attended meeting of foot ball enthusiasts Thursday evening at Bane's roller rink. There were many players present and there bids fair to be considerable rivalry as to who will make the team.

There will be another meeting at the Y. M. C. A. on Thursday evening of next week and the first try out will be held the Sunday following.

The roller rink has been secured for a roller skating party for the benefit of the team and it is hoped to raise money enough to equip them in good shape. The date of the party will be announced later.

Shoe Shop Moved

To Ransford block, corner 6th and Front street. All repairing done neatly and promptly.

53-t6 JOS. FRANKE. Shoemaker.

MRS. SAGE A SAMARITAN.

Picks Up Poor Man in Road and Helps Him on His Way.

Mrs. Russell Sage while visiting at Cold Springs, N. Y., was riding in her auto the other day when she found a poor man in a state of collapse near Fishkill, N. Y. He was exposed to the intense heat of the sun in a temperature of over 100. By her direction the man was placed in her car by the chauffeur and taken to Poughkeepsie. He became conscious on the way and explained that he had been ill in a hospital in Ossining and after his discharge had started to walk to Albany, where he has friends. His name is Everett Jocelyn, and he is thirty-five years old.

Dr. L. C. Wood was called to attend Jocelyn after Mrs. Sage arrived in Poughkeepsie. He said that Jocelyn was able to continue his journey by rail or boat. Mrs. Sage pressed a roll of bills into Jocelyn's hands.

Before leaving town Mrs. Sage called on Chief of Police McCabe and said that she remembered that her husband used to give a railroad ride and picnic at Upton Lake to poor children every summer.

"Mr. Sage's generosity was greatly appreciated," said the chief. "He was so popular that we all called him Uncle Russell."

"Chief," replied Mrs. Sage, "I want you to get up an outing like my husband used to give and send all the bills to me."

The chief promised that he would and started in at once to make preparations for the event.

WHEAT WITH SEVEN HEADS.

New Variety Is Expected to Yield Two Hundred Bushels to the Acre.

W. W. Ward, a wheat farmer near Dayton, Wash., has discovered a new variety of wheat that has seven distinct heads united to a common base. Each head is considerably larger than the ordinary wheat. Ward figures, says the Kansas City Star, that the new variety will yield as high as 280 bushels to the acre, with an average of 200 bushels.

Hundreds of farmers in the vicinity of Dayton have visited the Ward ranch to see the new wheat. All have asked for a few pounds of the seed, but Ward is figuring upon further experiments and plans to plant all of this year's crop next season, enlarging his present area to about three acres.

Monograms on Suit Buttons.

Women whose garments are of the smartest fasten and adorn their linen suits with hand painted buttons bearing their monograms. Miss Carow, sister of Mrs. Roosevelt, appeared in such a suit shortly before she sailed for Europe, and the fad has spread. The gown was of ecru linen, and the big buttons were of porcelain with her monogram, "E. K. C." in yellow and brown. The blouse had a watch pocket on which the monogram in the same colors was done in floss, and the same decoration appeared on the porcelain belt buckle. Miss Carow and her sister used to have the same initials, for her name is Emily Kermit and Mrs. Roosevelt's is Edith Kermit. In their girlhood days they chose different kinds of lettering to mark their possessions, and they cling to their varieties yet. As Ethel Roosevelt has the middle name Kermit, her initials are the same as her mother's. She uses a pretty little monogram designed by her aunt, who is an artist. It has elongated letters with tiny roses intertwined, the rose being the Roosevelt crest.

Odd Language.

A Frankfort produce dealer who drives about in his wagon went to a certain house the other day and was selling eggs and vegetables. "Can you spare me an extra pound of butter this week?" asked the housekeeper. "None, I can't," replied the dealer. "I could have spared you a pound yesterday, but not today."

This reminded a man in the crowd of what his little girl had said about some candy which was given her by an uncle and showed that the produce dealer is not the only connoisseur of words. The child's mother said to her: "Louise, go crack that stick of candy and bring some of it in here."

"It's already broke," replied the youngster and by this disproved the theory that all children speak correctly if they hear correct language. Louisville Courier-Journal.

ARM, HOME AND GARDEN

Killing Quack Grass

Frank Burns, a farmer near Winona, has tried an experiment in ridding his land of quack grass, which will probably solve this perplexing question. Rooting hogs according to the report of the Winona Independent do the work. Last week Mr. Burns is said to have turned about 30 hogs into a field of about nine or ten acres covered with quack grass. Knowing that the hogs would eat quack grass and had a fondness for the roots of the weed, he gave them nothing else to eat, and literally compelled them to "root, hog, or die."

The result was that they rooted and, instead of dying, took on some weight. But this was not the chief benefit nor was it Mr. Burns' sole intention when he turned the hogs into the field. In their natural zeal to eat and grow fat, the hogs turned over every foot of soil, devoured most of the roots and what were not eaten were exposed to the killing rays of the sun, and so died. It is said that Mr. Burns intends to clean up his whole farm in this way, and if his success is as good with the remainder as it has been with this first field, it will pay farmers everywhere to adopt this simple method of ridding their lands of these most noxious enemies of profitable farming.

CANNING CORN

Corn has always been considered the most difficult of vegetables to can successfully. By the methods commonly used at least some cans almost always spoil. The bacteria sometimes found upon the green corn are more resistant than those found in any other vegetable.

When ready to can corn, select ears in perfect roasting ear stage and with a sharp knife score each row of grains, cut a very thin slice from the ends of all the grains, and with a kitchen knife (or the back of a sharp knife) scrape the rest from the cob. For each quart of corn, put into the kettle a pint of water and half a tablespoonful of salt; put corn to cook and add boiling water as it evaporates. It should be as watery as commercial canned corn usually is. Let it cook for fifteen or twenty minutes after it actually boils all through. Watch and stir with a wooden spoon to prevent burning, but do not allow it to stop boiling.

The turning of the wheel will move the aeroplane to the right or the left, while the entire steering post, by a backward or forward motion, will govern the planes that mean flight upward or downward. In the Wright machine there are four levers for the purposes of steering. In the Farman aeroplane the wheel, by its natural movement or the movement of the steering post, governs the whole steering gear.

The engine will drive four propeller blades set at the rear like the propellers of a ship. The mechanics who set up the aeroplane said that owing to the necessity of having everything as light as possible the machine cannot carry enough water in its radiator and water circulator to admit of long flights. Also the weight of gasoline prevents the aeroplane from carrying much of the fuel.

The two main planes are well secured by means of piano wire which crisscrosses between the two surfaces, and the planes have an arch much like that of the wings of a bird. The experts explained that the small boy's kite really worked on the same general principle. The kite, they said, is a monoplane held against the wind by a string. In the case of the Farman aeroplane the string's place is taken by the motor and its propeller blades.

The whole aeroplane weighs 1,100 pounds. The motor, with water tanks and propeller, weighs 300 pounds. As a supporting structure to the planes and all of the upper works a chassis with wheels is set like the two hind wheels of a tricycle which has the little wheel in front. Two smaller bicycle wheels are set to the rudder house. All four wheels have pneumatic tires, so that the shock of the aeroplane striking the ground will be minimized.

MULE MASCOT FOR BRYAN.

Minnesota Fair Directors Sent Beast That Brays When Music Plays.

A mule answering to the name of Julia has been shipped from Minneapolis to Lincoln, Neb., to serve as a mascot for William Jennings Bryan. The animal is from a trained animal show and was purchased by the directors of the Minnesota state fair to be presented to the commoner.

The following telegram was sent to Mr. Bryan early the other day by B. F. Nelson, president of the state fair board:

"The state fair of Minnesota offers you as a campaign mascot one of a trained animal show's mules. It is a beautifully colored mule, perfectly gentle and warranted to kick the stuff out of the Republican elephant."

Mr. Nelson received the following reply from Mr. Bryan:

"I shall be pleased to accept the mule as a mascot. Send it on. Many thanks."

Julia was started on her way to Nebraska. She has been trained to bray whenever she hears the strains of music. She also dances to music.

Wastebasket Hat a Starter.

Cartoonists and humorists who have found so fertile a source of inspiration in the "Merry Widow" hat should turn to another Paris eccentricity in the millinery line. This resembles nothing so much as a wastebasket inverted over the wearer's head. Specimens of the new shape have been seen a great deal in New York city, and it may reach as much favor with us as it has with Frenchwomen, says the New York Press. The hats are made of braided rush and are of such a size as to conceal completely the features of the wearer from a person at her left. At the right the lower edge is bent up to show the face and hair and is caught with a large cluster of uncured ostrich plumes—plumes that shoot up in the air in all directions, then turn abruptly downward as if broken. Other favorite materials used for hats of the kind in Paris are shirred cretonne bound with black velvet ribbon and dotted tulle, surrounded with rows of ruches or rose garlands.

FARMAN'S NOVEL AIRSHIP.

Resembles a Huge Bird and Even Has a Birdlike Beak.

Henri Farman's aeroplane in which he recently made a successful flight at the Brighton Beach race track near New York is constructed somewhat after the fashion of a bird. In its flight it is operated on the principle of the bird, balancing itself in the air with widespread wings. The forward end of the machine even has a part that might be regarded as a huge beak.

There are two horizontal planes of thin, fragile canvas covered with a rubber composition. These are about five feet apart and measure thirty-two feet from end to end. Their width is six and a half feet. They are mounted on spruce frames of light weight. They form the aeroplane's main body.

When the aeroplane is in flight they move at right angles to their greatest dimension, or sideways. Set behind them ten feet away is a boxlike structure, two of whose sides are open, so that it presents no resistance to the air. This is the rudder house. Within the canvas box is a vertical plane whose movements, controlled by the steering wheel, govern the steering of the craft from side to side. The box rudder is intended to give the whole greater stability. The rudder house is 10 by 6 feet.

Set out on the front of the aeroplane are two vertical planes whose angles may be varied at will. These govern the downward and upward movement of the aeroplane. In the center of the two forward main horizontal planes is a little space partitioned off by means of two planes set at right angles to the main planes. Here Mr. Farman sits at the wheel. Behind him is the fifty horsepower eight cylinder motor with its spark and throttle with its side.

The turning of the wheel will move the aeroplane to the right or the left, while the entire steering post, by a backward or forward motion, will govern the planes that mean flight upward or downward. In the Wright machine there are four levers for the purposes of steering. In the Farman aeroplane the wheel, by its natural movement or the movement of the steering post, governs the whole steering gear.

The engine will drive four propeller blades set at the rear like the propellers of a ship. The mechanics who set up the aeroplane said that owing to the necessity of having everything as light as possible the machine cannot carry enough water in its radiator and water circulator to admit of long flights. Also the weight of gasoline prevents the aeroplane from carrying much of the fuel.

The two main planes are well secured by means of piano wire which crisscrosses between the two surfaces, and the planes have an arch much like that of the wings of a bird. The experts explained that the small boy's kite really worked on the same general principle. The kite, they said, is a monoplane held against the wind by a string. In the case of the Farman aeroplane the string's place is taken by the motor and its propeller blades.

The whole aeroplane weighs 1,100 pounds. The motor, with water tanks and propeller, weighs 300 pounds. As a supporting structure to the planes and all of the upper works a chassis with wheels is set like the two hind wheels of a tricycle which has the little wheel in front. Two smaller bicycle wheels are set to the rudder house. All four wheels have pneumatic tires, so that the shock of the aeroplane striking the ground will be minimized.

The turning of the wheel will move the aeroplane to the right or the left, while the entire steering post, by a backward or forward motion, will govern the planes that mean flight upward or downward. AIRSHIP PASSENGER LINE.

Details of One Planned Between Boston and New York.

Passengers between New York and Boston will within eighteen months be traveling in airships operated by a navigation company, according to an announcement by Charles J. Glidden, the automobile, who has recently become an enthusiastic balloonist.

Mr. Glidden says the company, permission to incorporate which was recently granted by the corporations commissioner, will use either dirigible balloons or aeroplanes. Its purpose will be to manufacture and operate aerial devices and to establish aerial routes for the transportation of freight and passengers in the United States, Canada and Mexico. With relay stations at Springfield and New Haven, the trips between New York and Boston can be made most of the year within seven or eight hours. Mr. Glidden plans to experiment first with small balloons capable of carrying one or two passengers besides the operator.

Stations will be established close to the street car lines on the outskirts of cities, with suitable facilities to house the dirigibles and supply any loss of gas en route. An inexpensive plant to manufacture hydrogen gas will be in operation at each station. As the dirigibles will travel at an average height of 500 to 800 feet, very little loss of gas should take place, he says.

Pending the establishment of the air line and to familiarize people with aerial voyages, ascensions will be made from Pittsfield and North Adams in the spherical balloons. The new company holds options on a large manufacturing plant of aerial apparatus and is negotiating for the manufacture of dirigibles. The form of dirigibles to be adopted will depend upon the success of the experiments now being carried on by the governments of the United States and France.

Aerial travel, says Mr. Glidden, will, when thoroughly established, be the cheapest and safest form of transportation.

Proper Length of the Foot.

A perfectly formed foot should, according to anatomists, be as long as that bone in the forearm which extends from the elbow to the joint of the wrist. This seems to be abnormally long in a tall person, but is the measurement taken by artists. Of course arms are sometimes out of proportion, being far too short for the general height, but it is rare that an arm is too long for the stature of the person.

To Digest the Food

Bile in the intestines is as important to digestion as are the gastric juices in the stomach and bile is only supplied when the liver is in active condition.

The serious and chronic forms of indigestion are cured by Dr. A. W. Chase's Kidney and Liver Pills because of their influence on the liver causing a good flow of bile to aid digestion and keep the bowels regular, thereby preventing fermentation of the food, the formation of gas and all the disagreeable symptoms of indigestion.

Long standing cases of chronic indigestion yield to Dr. A. W. Chase's Kidney and Liver Pills after all else has failed.

Mr. F. W. BIGLEY, Murrysville, W. Va., writes—"For sixteen years I suffered from indigestion and liver trouble and consulted several physicians in vain. Two boxes of Dr. A. W. Chase's Kidney and Liver Pills did more for me than all the medicines I ever used. My mother used them with equally good results."

One pill a dose, 25 cents a box, at all dealers or Dr. A. W. Chase Medicine Co., Buffalo, N. Y.

Regatta Grays and Stripes For Men Next Fall.

TAMER STYLES THE VOGUE.

Straps and Buckles Are Things of the Past, Says a Clothing Buyer. Derby to Be Popular, and Oxblood Shoes.

"It's all to be regatta grays and regatta stripes this fall. The extreme smarts have put the freaks out of business, and, thank heaven, we're going to sober down a bit."

The buyer for the men's clothing department of a Kansas City store was just back from New York full of lassiness. When he got a gentle listener cornered between the necktie counter and a ghastly, headless dummy in evening dress he stroked his mustache with his hand, says the Kansas City Times, and nervously slipped a deck of ash from his otherwise immaculate tan waistcoat and ran on:

"The country has been crazy about the freak or circus clothes, as we call them, for two seasons. Smart dressers this fall aren't going to stand for the kinks. Extreme lines are still to be the proper thing, but the endless plastering on of straps, buttons and buckles is going to be curtailed at both ends."

Kansas City has suffered only a mild form of the circus clothes malady. The freak dresser in New York has been so strapped, buckled and buttoned fore and aft that for the life of him the novice couldn't tell whether he was going or coming. Coat cuffs have assumed every form known to Euclid, and at some time or another a button has been slapped on at practically every point in the suit. Buttonholes have been run diagonally up and down and oval and pockets slanted in every possible manner. Shoes have carried brass buckles at every possible angle and have combined buckles and buttons and buckles and laces.

"The effect of this mad rampage is to show itself in a number of points about the tamer fall styles. A tendency toward a tasteful extreme is marked. The cuffs on the coat sleeves are still good, and the pockets have not returned to the straight, but the outlandish shapes for cuffs and the solid phalanxes of buttons are to be abolished. Lapels will be cut low and collars snug fitting. A diagonal seam slanting down and back just under the outside breast pocket is to be a favorite. It helps the tailor in bringing about the semiformal fitting and the full-chested appearance in front. Shoulders will not be extremely broad.

"The custom of lining the outside breast pocket with fancy silk—lavenders, heliotropes, azure and the like—will be common. The pocket may be turned partly wrong side out and the necessity of carrying a high priced silk handkerchief done away with. Coats will be just a trifle longer and dрап slightly in front.

"As to patterns and colors, the regatta stripe and the regatta gray are the very latest. This stripe ranges from a very narrow line to an eighth of an inch stripe. The gray is medium and strictly suitable for fall wear. Other favorite colors will be olives, dark tans and smokes. Double breasted waistcoats of smart imported fabrics, richly striped, will have everything their own way. Trousers with narrow waists and full hips and mostly without cuffs will be generally worn.

"As to hats, it will be derbies more than ever. The crowns will not be so full, the brims still flat and hardly so wide as the past season. The soft felts will be mostly crease hats. They are gradually getting away from the telescope idea by way of the dip crown. Fedoras and alpines will continue to be the proper covering for the staid and sober older men.

"Oxbloods, it is predicted, will run away with the shoe market. Buckles are to be absolutely tabooed and laces preferred to buttons. The narrow toes are to give way to a round toe on a sensible order. High tans and oxblood will be largely used all winter. The growing custom of wearing oxfords with overgaiters all winter will be more common than ever. Take it all in all, the dressy Americans are going to present a natty and fairly sober appearance the coming season."

Monument For Emigrants.

Though the national convention of the Ancient Order of Hibernians adjourned the other day, the new board of directors continued its session the next day and disposed of considerable routine work. Steps were taken to carry into effect the order of the convention for a monument to the 12,000 Irish emigrants who perished in the famine of 1841 at Grosse Isle, thirty miles from Quebec. The convention considered the matter favorably and left it to the board of directors to carry it into effect. President Cummings said that the monument would be erected before the Hibernians met at Portland in 1910, but nothing has yet been decided as to plans.

A Domestic Moose.

A cow moose came out of the woods near Houlton, Me., recently and is now making her home with the cattle on Ira Porter's farm. The moose seems to have lost all her wild instinct and is contented to remain with the cows.

Japan's Timber Exports.

Japan's beginning to send timber of excellent quality to England and other European countries.

GOULD CONSPIRACY CASE.

New York Grand Jury Has Taken Up Investigation.

New York, Aug. 7.—The grand jury has taken up the investigation into the alleged conspiracy to manufacture divorce evidence against Frank Jay Gould. Several of the principal witnesses gave testimony before the grand jury, but the result of that body's deliberations will not be announced for a day or two. The first witness to be called was Miss Mabel MacCauslan, the milliner's apprentice, whose story resulted in the arrest of Mrs. Ben Teal, wife of a prominent theatrical manager, Henry S. Mousley, a private detective, and Miss Julia Fleming, former friend of Mrs. Teal, all of whom are charged with subornation of perjury. Mrs. Teal and Henry Mousley are out on \$5,000 bail and Thursday bail was reduced from \$5,000 to \$2,000 in the case of Miss Fleming, but she was not bailed out. Miss Fleming has made a confession and the district attorney agreed to a reduction in the amount of her bail. Other witnesses called by the jury were Blanche Hale, a hair dresser at the Hotel Lincoln, and Miss Marie Falk, a dressmaker. The two witnesses corroborate the charges of Miss MacCauslan, it is said, claiming that they also were asked to swear to false affidavits against Mr. Gould.

"We halted, and a Tyrolese lying on the ground cried out: 'I am dying. Give me to drink.' Whereat my companion stooped to offer him a flask, and as he stooped the Tyrolese struck savagely at him with his bayonet, but my companion jumped back, and it missed him, and he said, 'You Tyrolese, you said you wanted a drink before you died, and now you shall die without the drink.' And he stuck his bayonet through him as a boy would stick a pin through a fly.

"The fighting soon began again, and it was very fierce. It was soon that we came to know that we were to capture a little village and the hills about the village. The village was named San Martino, and there were walled barns and gardens, and the Austrians were very strong there.

"The bursting of the shells was very bad. Sometimes all of us close by would be thrown down and be covered with mud and earth, but most of us would jump up again, not wounded, but always there were some who would not jump up again, because they were wounded or dead.

"At the beginning of a battle a soldier feels afraid. At the beginning of this battle I felt afraid, and I know that other men felt afraid, though it was not our first battle, and we knew what it was to be under fire.

"So it was that at the beginning we commanded ourselves; we felt like death, but soon that passed away, and we thought no more of death, but only of the killing of the Austrians.

"All around me men were killed. There were heads and arms blown off, and men flew into pieces like the smashing of a jug. But we did not care. We thought nothing of it. I do not know that we even knew we saw such things, but some of them come to me as I sit with you and talk of that long day. We did not notice, and we did not think that at any moment we too might have our heads blown off or be smashed into little pieces like the breaking of a jug.

"Once, when we rushed over the big guns and killed the men who still fought with us, we turned the guns to fire on the Austrians as they flew away, but they had driven bits of steel into the toughholes, and so we could not fire them. They were of a courage, those Austrians.

"Only once in all that battle did I think much of what I saw or heard, and that was when there was the terrible screaming of a captain who had his foot shot off. He twisted and turned as he cried out, and it was a very bad sound. But it is just as it chances. I saw many men who were hurt worse than that captain and many who were blown into little bits, but I did not trouble about them. It is just if it chances so.

"It is very often that a man does not know that he is hurt. I remember that once there was a man near me with a great hole in his forehead, but he ran right on with us with his bayonet, and I thought, 'He will fall dead.' But after that I saw him no more, for there was always the fighting.

"The storm and the blackness, they made of us a great mixing. Yes; it was a very great tangling, for all lines were lost, and I know that sometimes Austrians struck at Austrians and sometimes Italians struck at Italians, for we were in a very great mixing and very fierce in the blackness of that storm.

"We were told to lie down and sleep. So we lay down where we were, among the dead and the wounded, among the Italians and the Austrians.

"And we slept. Yes; we were tired for we had fought hard for all that long, long day, and on that hill that at last we had gained we slept, and we gave no heed to the dead men or the wounded.

"The wounded they made very great circles, and there were men sent to go among them with lights. Some were surgeons, and some were men to carry them to the field hospitals. But the most of us we lay there and slept, and we were very tired, and we knew that with the morning there might be another fight."

The Hungry Author.

The following is an extract from the notebook of an author:

"Rose at 5 and had a sonnet and a glass of cold water for breakfast.

"Retired early in the evening, without supper, as I feared the neighbors would be annoyed by the rattling of the knives and forks."—St. Louis Republic.

Failed to See.

"Poor man!" said the kind lady. "How did you go blind?"

"Well, mum," answered Tired Treadwell, "de foist time dat I noticed it was when I was out lookin' fer work."—Chicago Record-Herald.

Put a little more in than you take out, and your purse will soon fill.

SOLDIERS IN BATTLE

How Men Feel and Act With Death All About Them.

THE STORY OF A PRIVATE.

With the Beginning of the Fight Comes Fear, but That Soon Passes Away in the Eagerness For Killing. Varying Effects of Wounds.

A narrative of the battle of Solferino as told by a veteran survivor to Robert Shackleton appears in Harper's. It is word for word, a chapter of history as seen by a man in the ranks. Incidents which impressed him are curious:

"We halted, and a Tyrolese lying on the ground cried out: 'I am dying. Give me to drink.' Whereat my companion stooped to offer him a flask, and as he stooped the Tyrolese struck savagely at him with his bayonet, but my companion jumped back, and it missed him, and he said, 'You Tyrolese, you said you wanted a drink before you died, and now you shall die without the drink.' And he stuck his bayonet through him as a boy would stick a pin through a fly.

"The fighting soon began again, and it was very fierce. It was soon that we came to know that we were to capture a little village and the hills about the village. The village was named San Martino, and there were walled barns and gardens, and the Austrians were very strong there.

"The bursting of the shells was very bad. Sometimes all of us close by would be thrown down and be covered with mud and earth, but most of us would jump up again, not wounded, but always there were some who would not jump up again, because they were wounded or dead.

"At the beginning of a battle a soldier feels afraid. At the beginning of this battle I felt afraid, and I know that other men felt afraid, though it was not our first battle, and we knew what it was to be under fire.

"So it was that at the beginning we commanded ourselves; we felt like death, but soon that passed away, and we thought no more of death, but only of the killing of the Austrians.

"All around me men were killed. There were heads and arms blown off, and men flew into pieces like the smashing of a jug. But we did not care. We thought nothing of it. I do not know that we even knew we saw such things, but some of them come to me as I sit with you and talk of that long day. We did not notice, and we did not think that at any moment we too might have our heads blown off or be smashed into little pieces like the breaking of a jug.

"Once, when we rushed over the big guns and killed the men who still fought with us, we turned the guns to fire on the Austrians as they flew away, but they had driven bits of steel into the toughholes, and so we could not fire them. They were of a courage, those Austrians.

"Only once in all that battle did I think much of what I saw or heard, and that was when there was the terrible screaming of a captain who had his foot shot off. He twisted and turned as he cried out, and it was a very bad sound. But it is just as it chances. I saw many men who were hurt worse than that captain and many who were blown into little bits, but I did not trouble about them. It is just if it chances so.

"It is very often that a man does not know that he is hurt. I remember that once there was a man near me with a great hole in his forehead, but he ran right on with us with his bayonet, and I thought, 'He will fall dead.' But after that I saw him no more, for there was always the fighting.

"The storm and the blackness, they made of us a great mixing. Yes; it was a very great tangling, for all lines were lost, and I know that sometimes Austrians struck at Austrians and sometimes Italians struck at Italians, for we were in a very great mixing and very fierce in the blackness of that storm.

"We were told to lie down and sleep. So we lay down where we were, among the dead and the wounded, among the Italians and the Austrians.

"And we slept. Yes; we were tired for we had fought hard for all that long, long day, and on that hill that at last we had gained we slept, and we gave no heed to the dead men or the wounded.

"The wounded they made very great circles, and there were men sent to go among them with lights. Some were surgeons, and some were men to carry them to the field hospitals. But the most of us we lay there and slept, and we were very tired, and we knew that with the morning there might be another fight."

The Hungry Author.

The following is an extract from the notebook of an author:

"Rose at 5 and had a sonnet and a glass of cold water for breakfast.

"Retired early in the evening, without supper, as I feared the neighbors would be annoyed by the rattling of the knives and forks."—St. Louis Republic.

ELECTRICIANS JOIN STRIKERS

Decline to Work With the Non-union Laborers.

RAILWAY SHOPS IN DARKNESS

Employees in the Light Plant of the Canadian Pacific Quit Work—Reported That the Trainmen Also Will Go Out and That the Entire System Will Be Tied Up.

Winnipeg, Man., Aug. 7.—All Canadian Pacific railway shops are in darkness owing to electricians operating the light plant declining to work with nonunion labor. Three coach loads of strike-breakers reached here from St. Paul and Chicago and these, added to the Japs used in the roundhouses and the Italians and Galicians at work in other parts of the yard, add somewhat to the usual activity around the buildings. Porters on cars are now compelled to clean out their cars and every extra labor that can be utilized by the company is being pressed into service. Several hundred mechanics are expected from Pacific coast states, while the Eastern shops will supply their supply from the New England states.

Sixty union pickets have been placed on duty at the local shops, the company not being adverse to passive picketing, which is not illegal. At some shops in Far Western cities armed police are on guard, but this is not considered necessary here. All day at the shops everything was as quiet as could be. Outside of maintenance of way and stores employees, the only two departments not on strike, hardly a soul went in and there was no one around the small door of admission, which has been made in the wall close to the big gates, which are now strongly barred and only opened for entrance or exit of vehicles.

Pickets at Railway Terminals.

The most striking feature of the situation was the placing of between fifty and sixty pickets at the various railroad terminals and in the vicinity of the shops to meet all mechanics coming into the city and dissuade them from going to work for the company, if they had any such intention. J. H. McVey, local chairman of the strikers, authorized the statement that he had information from what he regarded as a thoroughly reliable source that a carload of strike-breakers is on the way here from Chicago. He was unable to state the number of men coming nor could he say exactly the hour of their arrival, although a strict lookout will be kept for them by pickets guarding the Soo Line and Great Northern terminals. Mr. McVey has been assured of the support of the Federation of Labor and already strike allowance has been made by the head office of the moulder. Single men will receive \$5 per week and married men \$7 during the life of the strike. Other branches are rapidly falling into line and ere long every striker will be provided for.

There is a report that the trainmen will come out on Saturday. This is denied by McVey, but is affirmed by all strikers who will talk, and who assert that the whole system will be tied up by Sunday. Trainmen do not consist of engineers, firemen and conductors, but of switchmen, brakemen, baggagemen and some of the conductors.

Word has reached here that the Canadian Pacific railroad coal storehouse was burnt at North Bay, Ont. At Kenora, Ont., divisional point east of here, a locomotive was run into a turntable pit and it is claimed that the act was done by one of the striking shopmen.

PLUNGED INTO DARKNESS.

Brief Strike of Electricians Cuts Off Lights in Paris.

Paris, Aug. 7.—Paris was plunged into darkness for two hours because of an attempt of electricians to carry out a general strike similar to that of March, 1907. The maneuver, which fortunately proved abortive, is attributed to a desire of the revolutionary laborites for revenge for an order issued Thursday afternoon by the prefect of the Seine closing the labor exchange to the federated unions of the department of the Seine because of the part the labor exchange played in the recent disturbances.

Shortly before 9 o'clock at night the current was abruptly cut off.

Consternation reigned in the newspaper offices, which were threatened with the deprivation of both light and power with which to run their presses. Urgent messages were dispatched to various parts of the city for engines

and automobiles with which it was intended to generate power. To the great relief of all persons concerned, however, the supply of electricity was resumed shortly after 10 o'clock as abruptly as it had ceased.

It appears that when they came on duty the night shift without the slightest warning, announced their intention to cease work and cut off the power. The director of the plant refused to be intimidated and threatened instant dismissal to all the electricians who persisted in the attitude they had taken. After deliberating for some time the workmen resumed work.

CARDINAL GIBBONS BETTER

American Prelate's Illness May Soon Be Overcome.

Rome, Aug. 7.—The condition of Cardinal Gibbons, who was taken ill Wednesday at Castle Gandolfo and was brought to Rome in order that he might be treated, is better. The internal symptoms have moderated somewhat, his headache is less violent and his temperature has fallen to 100 degrees.

The attending physician has ordered the American prelate to take a complete rest and has put him on a liquid diet. He considers the attack due to fruit eaten by the cardinal and expects that the illness soon will be overcome. He says that Cardinal

CARDINAL GIBBONS.

Gibbons felt so much better that the prelate hoped to be able Saturday to accompany Father A. P. Doyle, rector of the apostolic mission house at Washington, on a visit to Pope Pius, who wishes to speak with Father Doyle again concerning the institution of which he is in charge.

His holiness, when he learned of the indisposition of the cardinal, expressed his sorrow and the hope that he would soon recover. He sent Cardinal Gibbons his sympathy and asked to be constantly informed as to his condition.

DEMOCRATS HAVE ELABORATE PLAN

To Ascertain Sentiment Toward Standard Bearers.

Lincoln, Neb., Aug. 7.—As the result of a visit to William J. Bryan by Senator Bob Taylor of Tennessee, who is here to deliver a chautauqua lecture, the national committee of the Democratic party, with the concurrence of Mr. Bryan, will soon enter upon a most elaborate plan for ascertaining the sentiment of the country toward their standard bearers. This plan contemplates the formation of a national Democratic club with state and county clubs as subsidiaries, whose duty it will be to report to the central organization data favorable or unfavorable to the national ticket. It is proposed also that these clubs shall poll the voters of the United States and every section where the feeling is adverse to the Democratic candidates, to send literature and speakers.

The proposition regarding the national club promptly appealed to Mr. Bryan, who said that he would not wait for his visit to Chicago in a couple of weeks, when he is to confer with prominent men of the party, but would at once take steps to get the national club under way.

Aside from this the most important announcement from Fairview was the decision of Mr. Bryan to make an extended speech on the tariff question at Des Moines, Ia., on Aug. 21, and to spend the three following days in Chicago in consultation with Chairman Mack and other of the party leaders over the plan of campaign.

TWO SUSPECTS UNDER ARREST

Supposed to Have Murdered a Youth in Chicago.

COMMITTED BY A DEGENERATE

Police Do Not Believe That Crime Resulted From Attempt to Wipe Out the "Greek Slave" Traffic in the Windy City—One of the Suspects Caught in Wisconsin.

Chicago, Aug. 7.—Following the identification of the mutilated boy's body found in Mud lake and adjacent ponds and waterways as that of Tuffa Shishein, a Syrian, the police arrested Joseph Hasson on suspicion of being the murderer of the boy. In Hasson's room the police found a blood-stained garment, several blood-stained saws and an axe. The body gave every indication of having been dismembered with such instruments.

Developments have come rapidly in this case. On Tuesday the detectives were called to Mud lake, a pond which formed in the old bed of a branch of the Chicago river when the waters of the river were diverted to the drainage canal. Here boys had discovered the lower limbs of a human being, severed at the hips and at the knees and with one of the feet missing. The gory relics when found were wrapped in an old shirt and a news paper of July 29. The victim was then supposed to have been a woman, but the discovery of the torso the following day in the drainage canal a mile distant upset this supposition.

Every Greek detective in the city was put to work on the case in the belief that a Greek lad, a victim of the parricide system, had been summarily dealt with by some countryman against whom the boy had testified in the recent cases brought by the government to wipe out the "Greek slave" traffic.

Boys Discovered the Head.

Thursday boys swimming in Pellett's pond half a mile from the canal and having no connection with it, discovered the head, which was removed to the morgue and placed with other portions of the body. With the body thus restored it was possible to formulate a close description of the boy.

At the Lawndale station it was found the description tallied somewhat with that of Tuffa Shishein, whose disappearance from his home at 7 Johnson street last Sunday night had been reported by the lad's father, Samuel Shishein. First the shirt which the boy had worn, and the corpse were identified by members of the Shishein family, the mother fainting when she gazed for the first time on the body.

Inspector Dorman held a long interview with Samuel Shishein and at its conclusion the inspector declared that the boy had been the victim of a degenerate.

Taft was fifteen years of age, attended school and sometimes sold newspapers. That he was entangled in any crime or conspiracy which might have led to his murder is not entertained by the police.

A second arrest in the case took place at Racine, Wis., according to a message received from that city by Assistant Chief of Police Schuettler. The prisoner is Steve Cantlivcote, who roomed at the Shishein home until Saturday, when he left for Racine.

AGED RECLUSE SLAIN.

Robbery the Motive of Murder Committed in a Box Car.

Jerseyville, Ill., Aug. 7.—Peter Meyer, seventy-five years old, a recluse, was found dead on the floor of a box car in which he lived on the outskirts of this place, and \$10,000 is known to have had with him is missing. The body was several feet from his bed, surrounded by overturned chairs and torn clothing. Meyer's mouth was clotted with blood and there were many indications that his death was not a natural one.

Meyer, who had lived here for twenty-five years, is supposed to have been worth \$25,000. Two weeks ago he sold a 100-acre farm and it was generally believed that he had placed the proceeds with other money which he had hidden in his crude home.

Conditions Are Improving.

Vancouver, B. C., Aug. 7.—There are no new developments in the fire situation in Elk River valley. Conditions are gradually improving and people are returning to the scene of their former homes. Permits are granted at Fernie to erect temporary wooden buildings to be replaced with brick in ten months. People are being supplied with all necessities. The forest fire is diminishing in intensity and is now not near any settlement.

You should know if you don't

Talk No. 6

"MICHAEL'S"

"MICHAEL'S"

ANNOUNCED BY MACK.

Appointment of Two New Democratic Committees.

Buffalo, N. Y., Aug. 7.—Chairman Norman E. Mack of the Democratic national committee announced before his departure for Chicago the appointment of a finance committee for the Democratic campaign with Moses C. Wetmore of St. Louis as chairman and John E. Osborne of Wyoming as vice chairman, and a speakers' committee, with John H. Atwood of Kansas as chairman, and Champ Clark of Missouri as vice chairman. The finance committee is made up of twenty-nine members and the speakers' committee is composed of twenty-seven members.

Announcement also was made by Chairman Mack that Senator Charles A. Culberson of Texas had been appointed to succeed David R. Francis of Missouri as chairman of the advisory committee. In making known the change, Mr. Mack said:

"Former Governor Francis' acceptance of a place on the committee was assured. I did not anticipate that he contemplated a stay of any length abroad, but wired him. He answered that he would be absent during so much of the campaign that he ought not to be chairman, but would be pleased to be a member of the committee. Senator Culberson was asked to accept the chairmanship and has accepted."

CORDIAL GREETING EXTENDED TO TAFT

Republican Candidate Talks to Lawyers of Virginia.

Hot Springs, Va., Aug. 7.—There was no reservation in the Southern hospitality accorded to William H. Taft by the Virginia State Bar association here on the occasion of the address of the Republican candidate on the law's delay. His presence and introductory pleasantries were applauded by an audience representative of the social life of the Old Dominion, and the burden of his speech met the expressed approval of the lawyers present. At his conclusion, Mr. Taft was surrounded by members of the audience. A group photograph was taken under the trees, with Mr. Taft in the center.

At the banquet, which brought to a close the twentieth annual session of the association, Mr. Taft responded to the toast, "The President."

Mr. Taft prefaced his forty-minute speech on the law's delay by expressing two embarrassments he felt in appearing before a Virginia audience.

The first he made clear by this anecdote:

"As I was entering the hall here I was accosted by a very charming daughter of Virginia, a married lady, of whom I inquired on hearing her name, which was a Virginia name, whether she was a relative of a friend of my own from Virginia who bore the same name.

"Oh, no," she replied, "my poor husband is a Yankee."

The story seemed to remove the first embarrassment. The other was Mr. Taft's difficulty in discussing before the bar of Virginia a technical question, "because you know," he said, "eight years ago I ceased to be a judge and became a mere politician."

TRIUMPH FOR YOUNG TURKS

New Cabinet Is Composed of Their Nominees.

GRAND VIZIER FOR THIRD TIME

Kamil Pasha, Who Throughout His Career Has Struggled for a Constitutional Regime, Again Returned to Power—Committee Publishes a Remarkable Document.

Constantinople, Aug. 7.—The Young Turks have now completely triumphed. A new cabinet practically composed of their nominees and commanding public confidence is established on a constitutional basis, the sultan having given up his claim to the right to appoint the ministers of war and marine. Kamil Pasha, who for the third time has become grand vizier throughout his career has struggled for a constitutional regime and three has suffered exile for his opinions.

His ministry, with two exceptions is composed of new men of liberal views. Two of them are Christians Gabriel Eftendi, the minister of works is an Armenian, and Prince Mavrommato, the minister of agriculture, is a Greek.

The new ministry will publish its programme almost immediately and prepare for the elections.

Within the space of a fortnight since the proclamation of the constitution a regime appears to be firmly established and the court completely dispersed, without any disturbance. The Young Turks' committee publishes a remarkable document calling on the people not to attempt to satisfy personal vengeance on the ground that the indulgence in personalities is opposed to its sublime ideal. It calls upon all the government officials to do their duty and to report to the committee any difficulties which they may encounter in so doing. The document prohibits all private communications with the palace and urges the people to trust the committee and obey it implicitly.

MINNESOTA REPUBLICANS.

Open the State Campaign at a Meeting in Duluth.

Duluth, Aug. 7.—The Republican campaign in Minnesota was opened when several speakers of state and national prominence addressed the members of the West Duluth Republican club.

J. F. Jacobson, candidate for governor, spoke on divided responsibility, sounded the keynote of harmony and pleaded for a state government in the hands of a single party.

National Committeeman Frank B. Kellogg of St. Paul assailed the national Democratic platform. His speech related mainly to national issues. Congressman J. Adam Bede, Senator Moses E. Clapp and Clarence B. Miller of Duluth also delivered addresses.

Sunday is that day in the week when a man finds out in what spot his wife intends to sweep next and sits there.—Atchison Globe.

PYTHIANS ELECT OFFICERS

Henry P. Brown of Texas is Chosen Supreme Chancellor.

Boston, Aug. 7.—With the election of their officers the supreme lodge of the Knights Pythias closed the most important business session of their twenty-fifth convention, which opened in this city Monday. The Pythian Sisters also elected officers and exemplified the secret work of the order. The uniform rank devoted such of the day as was free from rain to competitive drills on Franklin field for the \$10,000 cash prizes offered. Announcement of the awards will be made Saturday.

Henry P. Brown of Cleburne, Tex., was elected supreme chancellor without contest, he having served as vice chancellor the past year. There was a spirited contest for vice chancellor. George W. Hanson of Calais, Me., finally was chosen. Other officers elected are:

Supreme prelate, Rev. Dewitt C. Cobb, Salem, N. J.; supreme keeper of records and seal, R. L. C. White, Nashville, Tenn. (re-elected); supreme master of exchequer, Thomas D. Meares, Wilmington, N. C. (re-elected); supreme master at arms, Samuel P. Davis, Davis, Okla.; supreme inner guard, E. Allison Powers, Quebec, Can.; supreme outer guard, William D. Cameron, Meridian, Miss.; board of insurance control, for six years, U. S. G. Cherry, Sioux Falls, S. D., and C. S. Davis, Denver.

The uniform rank assembly, consisting of twenty-six brigadier generals, formally appointed Major General Arthur J. Stobart of St. Paul, Minn., to succeed himself in command of the uniform rank. The appointment will come up before the supreme lodge for ratification.

FIFTEEN PEOPLE HURT.

Attempt Made to Dynamite a Viaduct in Cincinnati.

Cincinnati, Aug. 7.—Fifteen people were slightly injured and windows in all houses and factories within the immediate neighborhood were destroyed and the Harrison avenue viaduct suffered a \$10,000 damage as a result of an attempt to destroy the viaduct.

The viaduct is in course of construction and has been a matter of much contention during the last two city administrations.

At one time nonunion labor was employed, which caused a furore in local union labor circles and it is claimed by some that a union labor fanatic is the author of the explosion. The viaduct was to have been turned over to the city within a short time. The damage is thought to be confined to one pier. Several arrests have been made.

CARRIED A FORTUNE.

Man With Mind Unbalanced by Heat Arrested in Milwaukee.

Milwaukee, Aug. 7.—His mind unbalanced by work and heat, Norman C. Bassett, aged fifty, manager of a department in the Allis-Chalmers plant, wandered for several hours about town until a patrolman took him to the police station.

He carried a satchel which was found to contain \$50,000 in money, bonds and other negotiable paper when opened at Emergency hospital.

When taken into custody Bassett talked incoherently, was unable to tell the officers anything about himself, even his name, and imagined he was in a strange foreign city pursued by thieves. He is being kept at Emergency hospital.

* Rev. Mr. Abramson leaves tomorrow for International Falls where he will spend a month, exchanging pulpits with Rev. H. E. Fuller, of that city, who will occupy the pulpit in the First Baptist church here for the next month.

Richard Sinclair, the two and one-half year old child of Mr. and Mrs.

Robt. Sinclair, 1207 Norwood street died Wednesday evening of cholera infantum, and the father took the remains to Owatonna yesterday for interment.

H. W. Topping, of the firm of Parker & Topping, and Wm. Moir, supt. mechanical power on the Northern Pacific, arrived in the city this afternoon. General Manager Slade is expected to arrive tomorrow. It is said that needed improvements in the foundry are the matters under consideration.

We expect our Saturday trade to equal last Saturday, our opening day. So many new bargains have been added—Linnemann's. It

Roy Edmund Anderson, the oldest child of Mr. and Mrs. Ed. Anderson, 313 North Third street, died last night from appendicitis. He had only been sick a few days and failed to rally from an operation. The little fellow was six years of age and a bright child. The remains will be taken to Braham, Minn., tomorrow and the funeral held at that place Sunday.

Foley's Kidney Remedy will cure any case of kidney or bladder trouble that is not beyond the reach of medicine. No medicine can do more. H. P. Dunn mwf

Head Council A. R. Talbot, of the Modern Woodman of America, who is spending a vacation with the Nebraska colony at Pelican lake, has been induced to speak at a large Woodmen meeting at Pequot on Saturday evening. Woodmen from neighboring towns will be present. An invitation has been extended to Brainerd Camp to attend and it is expected a big delegation from Brainerd will go up Saturday evening.

How's This?

We offer one Hundred Dollars Reward for any information that will lead to the capture of H. C. Catarrh Cure. F. J. Cheney & Co., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm. WALDING, KINNAN & MARVIN. H. C. Catarrh Cure taken internally, acting directly on the mucous membranes of the system. Testimonials sent free. Price 75c per bottle. Sold by all druggists. Take Hall's Family Pills for constipation.

CHANGES IN GRAIN RATES

May Have Farreaching Effect on Movement of Crops.

Chicago, Aug. 7.—Changes in grain rates, which may have a farreaching effect on the movement of the coming crops, have been announced by the Chicago Great Western railroad. That line has filed tariffs putting equalized rates into effect between Omaha and Chicago and Omaha and St. Paul on grain coming from west of the Missouri river. The new rates vary between 8 and 10 cents and the former charges are 11 and 12 cents. The new rates apply to all territory on the Missouri Pacific and Burlington systems where the through rates are less than the sum of the local rates in and out of Omaha. The Great Western says that in all such cases it will take the haul East for what is left of the rate. Officials of other roads assert that a general "grain war" may result.

Motive for Suicide Revealed.

Minneapolis, Aug. 7.—The First National bank of Belle Plaine and the State bank at Robbinsdale, of each of which the late John G. Lund of Minneapolis was the largest stockholder, have closed their doors. Wednesday Lund committed suicide by shooting in his office in Minneapolis. The day before he had been told by National Bank Examiner Frank O. Hicks that the Belle Plaine bank was insolvent and must be closed, and the motive of the suicide is made plain. The Robbinsdale bank is not insolvent. It is a state institution.

Six Persons Injured.

Elgin, Ill., Aug. 7.—Six persons, all residents of Elgin, were painfully injured, six others badly bruised and hundreds of men and women thrown into a panic at a horse taming show when the bleachers crashed to the ground, endangering the lives of 300 people.

Making It Worse.

"I cannot bear actors," a lady at a garden party remarked to her fascinating companion. "They are so concreted."

"But I'm an actor myself," was the rejoinder, "and surely you don't think I'm conce

FILING FEE TO BE ONLY TEN DOLLARS

County Attorney Warner Received Ruling from Attorney General of State

SETTLES QUESTION OF FEES

Law Apparently Compelled Payment of \$20 But Attorney Does Not So Rule

County Attorney Warner has received a communication from the attorney general of the state of Minnesota giving his interpretation of the amendment to the law governing the filing fee for county offices. According to the attorney general the apparent meaning of the amendment, that candidates should pay \$20 for filing, was the result of an error in the punctuation of the printed copies. His decision is that the candidates should pay \$10 each before filing for the primary, and nothing for the general election. The county auditor will therefore refund \$10 of the amount paid by Messrs. Bane and Albertson.

County Superintendent Wilson filed for renomination today.

Kyle-McFadden

Claude C. Kyle and Mrs. Julia K. McFadden were united in matrimony at St. Paul Wednesday evening, Aug. 5th, by Rev. John Wright, of St. Paul's Episcopal church of that city. Mr. and Mrs. Kyle left St. Paul Thursday evening for Yellowstone park and Western Canada on a two weeks wedding trip. Mr. and Mrs. Kyle have a host of friends in Brainerd who wish them much joy and prosperity. Their future home will be at 1724 Marshall Ave., Merriam Park.

No one is immune from kidney trouble, so just remember that Foley's Kidney Remedy will stop the irregularities and cure any case of kidney or bladder trouble that is not beyond the reach of medicine. H. P. Dunn. mwf

Important Change of Time

Commencing Sunday, August 9, Northern Pacific train No. 11 for Staples, Minnesota, Dakota, and Pacific Coast points will leave Brainerd at 12:20 p.m. instead of 11:10 a.m. This change puts this train back to the old schedule in effect prior to May 31. 554

Horan—Is O'Brien a good bluffer? Doran—No; whenever he gets a shpade he spits on his hands.—London Illustrated Bits.

Attention, Asthma Sufferers! Foley's Honey and Tar will give immediate relief to asthma sufferers and has cured many cases that has refused to yield to other treatment. Foley's Honey and Tar is the best remedy for coughs, colds and all throat and lung trouble. Contains no harmful drugs. H. P. Dunn. mwf

Norris and Rowe Circus

With the Greater Norris and Rowe Circus, museum, menagerie, hippodrome and congress of nations which will exhibit in this city Wednesday, August 12, are a number of performers of international reputation. Performers have appeared at all the principal circuses and hippodromes of the world prominent among them being the Peerless Potters, a troupe of aerialists whose flights through space quicken the pulse and "make the hair stand on end like the quills upon the fretful porcupine." This family of aerialists are acknowledged to be the greatest performers in their line in the world. Another family of wide reputation is the Astral St. Leons, scions of the famous family of that name, whose achievements in the sawdust arena have been seen throughout the world. The Honey-Mora troupe of aerialists were brought to this country from Europe direct by Norris and Rowe.

A Boon to Elderly People

Most elderly people have some kidney or bladder disorder that is both painful and dangerous. Foley's Kidney Remedy has proven a boon to many elderly people as it stimulates the urinary organs, corrects irregularities and tones up the whole system. Commence taking Foley's Kidney Remedy at once and be vigorous. H. P. Dunn. mwf

CHANGE OF NAME

H. R. Hitch Company Succeeded by The Northwestern Fuel Company in Wood and Coal Business

The wood, coal and cement business heretofore conducted under the name of the H. H. Hitch Co. will hereafter be done under the name of the Northwestern Fuel Co. It will be conducted by Mr. Hitch and the same parties heretofore interested with him.

Cured Hay Fever and Summer Cold A. S. Nusbaum, Batesville, Indiana, writes: "Last year I suffered for three months with a summer cold so distressing that it interfered with my business. I had many of the symptoms of hay fever, and a doctor's prescription did not reach my case, and I took several medicines which seemed only to aggravate it. Fortunately I insisted upon having Foley's Honey and Tar. It quickly cured me. My wife has since used Foley's Honey and Tar with the same success." H. P. Dunn mwf

FOOT BALL MEETING

Well Attended Meeting of Foot Ball Players in Roller Rink Thursday Evening

There was a well attended meeting of foot ball enthusiasts Thursday evening at Bane's roller rink. There were many players present and there bids fair to be considerable rivalry as to who will make the team.

There will be another meeting at the Y. M. C. A. on Thursday evening of next week and the first try out will be held the Sunday following.

The roller rink has been secured for a roller skating party for the benefit of the team and it is hoped to raise money enough to equip them in good shape. The date of the party will be announced later.

Shoe Shop Moved

To Ransford block, corner 6th and Front street. All repairing done neatly and promptly.

53-t6 **JOS. FRANKE. Shoemaker.**

MRS. SAGE A SAMARITAN.

Picks Up Poor Man in Road and Helps Him on His Way.

Mrs. Russell Sage while visiting at Cold Springs, N. Y., was riding in her auto the other day when she found a poor man in a state of collapse near Fishkill, N. Y. He was exposed to the intense heat of the sun in a temperature of over 100. By her direction the man was placed in her car by the chauffeur and taken to Poughkeepsie. He became conscious on the way and explained that he had been ill in a hospital in Ossining and after his discharge had started to walk to Albany, where he has friends. His name is Everett Jocelyn, and he is thirty-five years old.

Dr. L. C. Wood was called to attend Jocelyn after Mrs. Sage arrived in Poughkeepsie. He said that Jocelyn was able to continue his journey by rail or boat. Mrs. Sage pressed a roll of bills into Jocelyn's hands.

Before leaving town Mrs. Sage called on Chief of Police McCabe and said that she remembered that her husband used to give a railroad ride and picnic at Upton Lake to poor children every summer.

"Mr. Sage's generosity was greatly appreciated," said the chief. "He was so popular that we all called him Uncle Russell."

"Cheif," replied Mrs. Sage, "I want you to get up an outing like my husband used to give and send all the bills to me."

The chief promised that he would and started in at once to make preparations for the event.

WHEAT WITH SEVEN HEADS.

New Variety is Expected to Yield Two Hundred Bushels to the Acre.

W. W. Ward, a wheat farmer near Dayton, Wash., has discovered a new variety of wheat that has seven distinct heads united to a common base. Each head is considerably larger than the ordinary wheat. Ward figures, says the Kansas City Star, that the new variety will yield as high as 280 bushels to the acre, with an average of 200 bushels.

Hundreds of farmers in the vicinity of Dayton have visited the Ward ranch to see the new wheat. All have asked for a few pounds of the seed, but Ward is figuring upon further experiments and plans to plant all of this year's crop next season, enlarging his present area to about three acres.

Monograms on Suit Buttons.

Women whose garments are of the smartest fasten and adorn their linen suits with hand painted buttons bearing their monograms. Miss Carow, sister of Mrs. Roosevelt, appeared in such a suit shortly before she sailed for Europe, and the fad has spread. The gown was of ecru linen, and the big buttons were of porcelain with her monogram, "E. K. C." in yellow and brown. The blouse had a watch pocket on which the monogram in the same colors was done in floss, and the same decoration appeared on the porcelain belt buckle. Miss Carow and her sister used to have the same initials, for her name is Emily Kermit and Mrs. Roosevelt's is Edith Kermit. In their girlhood days they chose different kinds of lettering to mark their possessions, and they cling to their varieties yet. As Ethel Roosevelt has the middle name Kermit, her initials are the same as her mother's. She uses a pretty little monogram designed by her aunt, who is an artist. It has elongated letters with tiny roses intertwined, the rose being the Roosevelt crest.

Odd'Language. A Frankfort produce dealer who drives about in his wagon went to a certain house the other day and was selling eggs and vegetables.

"Can you spare me an extra pound of butter this week?" asked the house-keeper.

"None, I can't," replied the dealer. "I could have spared you a pound yesterday, but not today."

This reminded a man in the crowd of what his little girl had said about some candy which was given her by an uncle and showed that the produce dealer is not the only coiner of words. The child's mother said to her:

"Louise, go crack that stick of candy and bring some of it in here."

"It's already broke," replied the youngster and by this disproved the theory that all children speak correctly if they hear correct language.

—Louisville Courier-Journal.

ARM, HOME AND GARDEN

Killing Quack Grass

Frank Burns, a farmer near Winona, has tried an experiment in ridding his land of quack grass, which will probably solve this perplexing question. Rooting hogs according to the report of the Winona Independent do the work. Last week Mr. Burns is said to have turned about 30 hogs into a field of about nine or ten acres covered with quack grass. Knowing that the hogs would eat quack grass and had a fondness for the roots of the weed, he gave them nothing else to eat, and literally compelled them to "root, hog, or die."

The result was that they rooted and, instead of dying, took on some weight. But this was not the chief benefit nor was it Mr. Burns' sole intention when he turned the hogs into the field. In their natural zeal to eat and grow fat, the hogs turned over every foot of soil, devoured most of the roots and what were not eaten were exposed to the killing rays of the sun, and sodded.

It is said that Mr. Burns intends to clean up his whole farm in this way, and if his success is as good with the remainder as it has been with this first field, it will pay farmers everywhere to adopt this simple method of ridding their lands of these most noxious enemies of profitable farming.

CANNING CORN

Corn has always been considered the most difficult of vegetables to can successfully. By the methods commonly used at least some cans almost always spoil. The bacteria sometimes found upon the green corn are more resistant than those found in any other vegetable.

When ready to can corn, select ears in perfect roasting ear stage and with a sharp knife score each row of grains, cut a very thin slice from the ends of all the grains, and with a kitchen knife (or the back of a sharp knife) scrape the rest from the cob. For each quart of corn, put into the kettle a pint of water and half a tablespoonful of salt; put corn to cook and add boiling water as it evaporates. It should be as watery as commercial canned corn usually is. Let it cook for fifteen or twenty minutes after it actually boils all through. Watch and stir with a wooden spoon to prevent burning, but do not allow it to stop boiling.

When it has boiled for twenty minutes fill sterilized jars and seal. Then place the cans in a pan of hot water, having the water extend up to the rims and let it boil for half an hour, being sure that it does boil that length of time. The center of the can must reach the highest degree of heat possible, and they cannot reach that temperature unless the surrounding water is boiling all of the given time. Let the cans stand until the next day, then put them in a cold water bath and cook for half an hour after the water begins to boil; repeat the treatment on the third day. Tighten the covers if possible, while contents of jars are still boiling hot; wipe and set away where there is no draft and allow to cool.

The first boiling if properly done will kill the living germs, and the spores will remain unaffected. By the second and third day all of the spores will have reached the vegetable stage, in which they reproduce and may then be exterminated by continued boiling heat. If a single germ is left alive in the food after boiling, the canning will be a failure, because these invisible enemies of the housewife grow and multiply so rapidly that one left alive will speedily cause a large amount of food to spoil. This is the only sure process of canning this vegetable without the use of chemicals. Success may sometimes attend the other methods, but a great deal of uncertainty must always exist. If no germs of this kind happen to be present all will be well, but if they are present, all is lost. Another favorable feature of this method is that as the cans are sealed all the time, there is no danger of contamination from the air or other sources after the canning process begins.

J. L. SHEPPARD.

How to Avoid Appendicitis

Most victims of appendicitis are those who are habitually constipated. Foley's Orino Laxative cures chronic constipation by stimulating the liver and bowels and restores the natural action of the bowels. Foley's Orino Laxative does not nauseate or gripe and is mild and pleasant to take. Refuse substitutes. H. P. Dunn. mwf

An Effectual Threat.

Somewhere in the vein of "Extra Billy" Smith, the Confederate general, there must have run an infusion of Hibernian blood. At least it is suggested by a story told of him in the Sunday Magazine. Smith was one of the most irascible as well as one of the most patriotic of officers.

On one occasion he was leading the regiment of which he was then colonel on a long and difficult march. Weary and exhausted, the men halted for a rest by the wayside. When it became necessary to move on, the general gave the order, but the tired men remained stretched upon the ground.

The order was repeated peremptorily. Still no motion. By this time the temper of the general was at a white heat. He thundered out:

"If you don't get up and start at once I'll march the regiment off and leave every one of you behind."

FARMAN'S NOVEL AIRSHIP.

Resembles a Huge Bird and Even Has a Birdlike Beak.

Henri Farman's aeroplane in which he recently made a successful flight at the Brighton Beach race track near New York is constructed somewhat after the fashion of a bird. In its flight it is operated on the principle of the bird, balancing itself in the air with widespread wings. The forward end of the machine even has a part that might be regarded as a huge beak.

There are two horizontal planes of thin, fragile canvas covered with a rubber composition. These are about five feet apart and measure thirty-two feet from end to end. Their width is six and a half feet. They are mounted on spruce frames of light weight. They form the aeroplane's main body.

When the aeroplane is in flight they move at right angles to their greatest dimension, or sideways. Set behind them ten feet away is a boxlike structure, two of whose sides are open, so that it presents no resistance to the air. This is the rudder house. Within the canvas box is a vertical plane whose movements, controlled by the steering wheel, govern the steering of the craft from side to side. The box rudder is intended to give the whole greater stability. The rudder house is 10 by 6 feet.

Set out on the front of the aeroplane are two vertical planes whose angles may be varied at will. These govern the downward and upward movement of the aeroplane. In the center of the two forward main horizontal planes is a little space partitioned off by means of two planes set at right angles to the main planes. Here Mr. Farman sits at the wheel. Behind him is the fifty horsepower eight cylinder motor with its sparkler and throttle at his side.

The turning of the wheel will move the aeroplane to the right or the left, while the entire steering post, by a backward or forward motion, will govern the planes that mean flight upward or downward. In the Wright machine there are four levers for the purposes of steering. In the Farman aeroplane the wheel, by its natural movement or the movement of the steering post, governs the whole steering gear.

The engine will drive four propeller blades set at the rear like the propellers of a ship. The mechanics who set up the aeroplane said that owing to the necessity of having everything as light as possible the machine cannot carry enough water in its radiator and water circulator to admit of long flights. Also the weight of gasoline prevents the aeroplane from carrying much of the fuel.

The two main planes are well secured by means of piano wire which crisscrosses between the two surfaces, and the planes have an arch much like that of the wings of a bird. The experts explained that the small boy's kite really worked on the same general principle. The kite, they said, is a monoplane held against the wind by a string. In the case of the Farman aeroplane the string's place is taken by the motor and its propeller blades.

The whole aeroplane weighs 1,100 pounds. The motor, with water tanks and propeller, weighs 300 pounds. As a supporting structure to the planes and all of the upper works a chassis with wheels is set like the two hind wheels of a tricycle which has the little wheel in front. Two smaller bicycle wheels are set to the rudder house. All four wheels have pneumatic tires, so that the shock of the aeroplane striking the ground will be minimized.

MULE MASCOT FOR BRYAN.

Minnesota Fair Directors Sent Beast That Brays When Music Plays.

A mule answering to the name of Julia has been shipped from Minneapolis to Lincoln, Neb., to serve as a mascot for William Jennings Bryan. The animal is from a trained animal show and was purchased by the directors of the Minnesota state fair to be presented to the commoner.

The following telegram was sent to Mr. Bryan early the other day by B. F. Nelson, president of the state fair board:

"The state fair of Minnesota offers you as a campaign mascot one of a trained animal show's mules. It is a beautifully colored mule, perfectly gentle and warranted to kick the stuffing out of the Republican elephant."

Mr. Nelson received the following reply from Mr. Bryan:

"I shall be pleased to accept the mule as a mascot. Send it on. Many thanks."

Julia was started on her way to Nebraska. She has been trained to bray whenever she hears the strains of music. She also dances to music.

Wastebasket Hat a Starter.

Cartoonists and humorists who have found so fertile a source of inspiration in the "Merry Widow" hat should turn to another Paris eccentricity in the millinery line. This resembles nothing so much as a wastebasket inverted over the wearer's head. Specimens of the new shape have been seen already in New York city, and it may reach as much favor with us as it has with Frenchwomen, says the New York Press. The hats are made of braided rush and are of such a size as to conceal completely the features of the wearer from a person at her left. At the right the lower edge is bent up to show the face and hair and is caught with a large cluster of uncured ostrich plumes—plumes that shoot up in the air in all directions, then turn abruptly downward as if broken.

Other favorite materials used for hats of the kind in Paris are shirred cretonne bound with black velvet ribbon and dotted tulle, surrounded with rows of ruches or rose garlands.

Opening Piano Sale

YOU have read all about it and we take it that you are just as wide-awake as we are—and on watch. If you buy a Piano of us today you add a clean profit to your assets of \$150 to \$250—a good month's salary. You owe an investigation to yourself.

AIRSHIP PASSENGER LINE.

Details of One Planned Between Boston and New York.

Passengers between New York and Boston will within eighteen months be traveling in airships operated by a navigation company, according to an announcement by Charles J. Glidden, the automobilist, who has recently become an enthusiastic balloonist.

Mr. Glidden says the company, permission to incorporate which was recently granted by the corporations commissioner, will use either dirigible balloons or aeroplanes. Its purpose will be to manufacture and operate aerial devices and to establish aerial routes for the transportation of freight and passengers in the United States, Canada and Mexico. With relay stations at Springfield and New Haven, the trips between New York and Boston can be made most of the year within seven or eight hours. Mr. Glidden plans to experiment first with small balloons capable of carrying one or two passengers besides the operator.

Stations will be established close to the street car lines on the outskirts of cities, with suitable facilities to house the dirigibles and supply any loss of gas en route. An inexpensive plant to manufacture hydrogen gas will be in operation at each station. As the dirigibles will travel at an average height of 500 to 800 feet, very little loss of gas should take place, he says.

Pending the establishment of the air line and to familiarize people with aerial voyages, ascensions will be made from Pittsfield and North Adams in the spherical balloons. The new company holds options on a large manufacturing plant of aerial apparatus and is negotiating for the manufacture of dirigibles. The form of dirigibles to be adopted will depend upon the success of the experiments now being carried on by the governments of the United States and France.

Aerial travel, says Mr. Glidden, will, when thoroughly established, be the cheapest and safest form of transportation.

Proper Length of the Foot.

A perfectly formed foot should, according to anatomists, be as long as that bone in the forearm which extends from the elbow to the joint of the wrist. This seems to be abnormally long in a tall person, but is the measurement taken by artists. Of course arms are sometimes out of proportion, being far too short for the general height, but it is rare that an arm is too long for the stature of the person.

To Digest the Food

Bile in the intestines is as important to digestion as are the gastric juices in the stomach and bile is only supplied when the liver is in active condition.

The serious and chronic forms of indigestion are cured by Dr. A. W. Chase's Kidney and Liver Pills because of their influence on the liver causing a good flow of bile to aid digestion and keep the bowels regular, thereby preventing fermentation of the food, the formation of gas and all the disagreeable symptoms of indigestion.

Long standing cases of chronic indigestion yield to Dr. A. W. Chase's Kidney and Liver Pills after all else has failed.

Mr. F. W. BIGLEY, Murrayville, W. Va., writes: "For sixteen years I suffered from indigestion and liver trouble and consulted several physicians in vain. Two boxes of Dr. A. W. Chase's Kidney and Liver Pills did more for me than all the medicines I ever used. My mother used them with equally good results."

One pill a dose, 25 cts a box, at all dealers or Dr. A. W. Chase Medicine Co., Buffalo, N. Y.

Regatta Grays and Stripes For Men Next Fall.

TAMER STYLES THE VOGUE.

Straps and Buckles Are Things of the Past, Says a Clothing Buyer. Derby to Be Popular, and Oxblood Shoes.

"It's all to be regatta grays and regatta stripes this fall. The extreme smarts have put the freaks out of business, and, thank heaven, we're going to sober down a bit."

The buyer for the men's clothing department of a Kansas City store was just back from New York full of late news. When he got a gentle listener cornered between the necktie counter and a ghastly, headless dummy in evening dress he stroked his mustache with his hand, says the Kansas City Times. Teal and Henry Mousley are out on \$5,000 bail and Thursday ball was reduced from \$5,000 to \$2,000 in the case of Miss Fleming, but she was not bailed out. Miss Fleming has made a confession and the district attorney agreed to a reduction in the amount of her bail. Other witnesses called by the jury were Blanche Hale, a hair dresser at the Hotel Lincoln, and Miss Marie Falk, a dressmaker. The two witnesses corroborate the charges of Miss MacCauslan, it is said, claiming that they also were asked to swear to false affidavits against Mr. Gould.

GOULD CONSPIRACY CASE.

New York Grand Jury Has Taken Up Investigation.

New York, Aug. 7.—The grand jury has taken up the investigation into the alleged conspiracy to manufacture divorce evidence against Frank Jay Gould. Several of the principal witnesses gave testimony before the grand jury, but the result of that body's deliberations will not be announced for a day or two. The first witness to be called was Miss Mabel MacCauslan, the milliners' apprentice, whose story resulted in the arrest of Mrs. Ben Teal, wife of a prominent theatrical manager, Henry S. Mousley, a private detective, and Miss Julia Fleming, former friend of Mrs. Teal, all of whom are charged with subornation of perjury. Mrs. Teal and Henry Mousley are out on \$5,000 bail and Thursday ball was reduced from \$5,000 to \$2,000 in the case of Miss Fleming, but she was not bailed out. Miss Fleming has made a confession and the district attorney agreed to a reduction in the amount of her bail. Other witnesses called by the jury were Blanche Hale, a hair dresser at the Hotel Lincoln, and Miss Marie Falk, a dressmaker. The two witnesses corroborate the charges of Miss MacCauslan, it is said, claiming that they also were asked to swear to false affidavits against Mr. Gould.

"We halted, and a Tyrolese lying on the ground cried out: 'I am dying. Give me to drink.' Whereat my companion stooped to offer him a flask, and as he stooped the Tyrolese struck savagely at him with his bayonet, but my companion jumped back, and it missed him, and he said, 'You Tyrolese, I say you wanted a drink before you died, and now you shall die without the drink.' And he stuck his bayonet through him as a boy would stick a pin through a fly.

"The fighting soon began again, and it was very fierce. It was soon that we came to know that we were to capture a little village and the hills about the village. The village was named San Maritino, and there were walled barns and gardens, and the Austrians were very strong there.

"The bursting of the shells was very bad. Sometimes all of us close by would be thrown down and be covered with mud and earth, but most of us would jump up again, not wounded, but always there were some who would not jump up again, because they were wounded or dead.

"At the beginning of a battle a soldier feels afraid. At the beginning of this battle I felt afraid, and I know that other men felt afraid, though it was not our first battle, and we knew what it was to be under fire.

"So it was that at the beginning we commanded ourselves; we felt like death, but soon that passed away, and we thought no more of death, but only of the killing of the Austrians.

"All around me men were killed. There were heads and arms blown off, and men flew into pieces like the smashing of a jug. But we did not care. We thought nothing of it. I do not know that we even knew we saw such things, but some of them come to me as I sit with you and talk of that long day. We did not notice, and we did not think that at any moment we too might have our heads blown off or be smashed into little pieces like the breaking of a jug.

"Once, when we rushed over the big guns and killed the men who still fought with us, we turned the guns to fire on the Austrians as they flew away, but they had driven bits of steel into the touchholes, and so we could not fire them. They were of a courage, those Austrians.

"Only once in all that battle did I think much of what I saw or heard, and that was when there was the terrible screaming of a captain who had his foot shot off. He twisted and turned as he cried out, and it was a very bad sound. But it is just as it chances. I saw many men who were hurt worse than that captain and many who were blown into little bits, but I did not trouble about them. It is just if it chances so.

"It is very often that a man does not know that he is hurt. I remember that once there was a man near me with a great hole in his forehead, but he ran right on with us with his bayonet, and I thought, 'He will fall dead.' But after that I saw him no more, for there was always the fighting.

"The storm and the blackness, they made of us a great mixing. Yes; it was a very great tangling, for all lines were lost, and I know that sometimes Austrians struck at Austrians and sometimes Italians struck at Italians, for we were in a very great mixing and very fierce in the blackness of that storm.

"We were told to lie down and sleep. So we lay down where we were, among the dead and the wounded, among the Italians and the Austrians.

"And we slept. Yes; we were tired for we had fought hard for all that long, long day, and on that hill that at last we had gained we slept, and we gave no heed to the dead men or the wounded.

"The wounded they made very great cries, and there were men sent to go among them with lights. Some were surgeons, and some were men to carry them to the field hospitals. But the most of us lay there and slept, and we were very tired, and we knew that with the morning there might be another fight."

Japan's Timber Exports.

Japan is beginning to send timber of excellent quality to England and other European countries.

SOLDIERS IN BATTLE

How Men Feel and Act With Death All About Them.

THE STORY OF A PRIVATE.

With the Beginning of the Fight Comes Fear, but That Soon Passes Away in the Eagerness For Killing. Varying Effects of Wounds.

A narrative of the battle of Solferino as told by a veteran survivor to Robert Shackleton appears in Harper's. It is, word for word, a chapter of history as seen by a man in the ranks. Incidents which impressed him are curious:

"We halted, and a Tyrolese lying on the ground cried out: 'I am dying. Give me to drink.' Whereat my companion stooped to offer him a flask, and as he stooped the Tyrolese struck savagely at him with his bayonet, but my companion jumped back, and it missed him, and he said, 'You Tyrolese, I say you wanted a drink before you died, and now you shall die without the drink.' And he stuck his bayonet through him as a boy would stick a pin through a fly.

"The fighting soon began again, and it was very fierce. It was soon that we came to know that we were to capture a little village and the hills about the village. The village was named San Maritino, and there were walled barns and gardens, and the Austrians were very strong there.

"The bursting of the shells was very bad. Sometimes all of us close by would be thrown down and be covered with mud and earth, but most of us would jump up again, not wounded, but always there were some who would not jump up again, because they were wounded or dead.

"At the beginning of a battle a soldier feels afraid. At the beginning of this battle I felt afraid, and I know that other men felt afraid, though it was not our first battle, and we knew what it was to be under fire.

"So it was that at the beginning we commanded ourselves; we felt like death, but soon that passed away, and we thought no more of death, but only of the killing of the Austrians.

"All around me men were killed. There were heads and arms blown off, and men flew into pieces like the smashing of a jug. But we did not care. We thought nothing of it. I do not know that we even knew we saw such things, but some of them come to me as I sit with you and talk of that long day. We did not notice, and we did not think that at any moment we too might have our heads blown off or be smashed into little pieces like the breaking of a jug.

"Once, when we rushed over the big guns and killed the men who still fought with us, we turned the guns to fire on the Austrians as they flew away, but they had driven bits of steel into the touchholes, and so we could not fire them. They were of a courage, those Austrians.

"Only once in all that battle did I think much of what I saw or heard, and that was when there was the terrible screaming of a captain who had his foot shot off. He twisted and turned as he cried out, and it was a very bad sound. But it is just as it chances. I saw many men who were hurt worse than that captain and many who were blown into little bits, but I did not trouble about them. It is just if it chances so.

"It is very often that a man does not know that he is hurt. I remember that once there was a man near me with a great hole in his forehead, but he ran right on with us with his bayonet, and I thought, 'He will fall dead.' But after that I saw him no more, for there was always the fighting.

"The storm and the blackness, they made of us a great mixing. Yes; it was a very great tangling, for all lines were lost, and I know that sometimes Austrians struck at Austrians and sometimes Italians struck at Italians, for we were in a very great mixing and very fierce in the blackness of that storm.

"We were told to lie down and sleep. So we lay down where we were, among the dead and the wounded, among the Italians and the Austrians.

"And we slept. Yes; we were tired for we had fought hard for all that long, long day, and on that hill that at last we had gained we slept, and we gave no heed to the dead men or the wounded.

"The wounded they made very great cries, and there were men sent to go among them with lights. Some were surgeons, and some were men to carry them to the field hospitals. But the most of us lay there and slept, and we were very tired, and we knew that with the morning there might be another fight."
